

Effect of Study Abroad on Expected Graduation Date

Global Program Support -- Spring 2013

A typical myth about studying abroad is that it will delay graduation. Data for Texas A&M students who pursue credit bearing experiences abroad consistently show that it is possible to build such options into one's degree plan so that including a high impact experience abroad will not delay graduation.

Data and Research Services examined graduation data for entering first time full time freshman cohorts for Fall 2001, 2002, and 2003 in Spring 2010. This report found that there was no significant difference in the time taken to graduate between those who studied abroad and those who did not. Examination of data for entering cohorts for Fall 2004, 2005, and 2006, show similar results (see below). Both reports are available on the Global Program Support website: <http://globalsupport.tamu.edu>.

- (1) Cohorts comprised of first-time, fulltime freshmen completing a first undergraduate degree. Students receiving two degrees counted only once in cohort. Study Abroad is defined as credit bearing courses noted in COMPASS for faculty led, Reciprocal Educational Exchange, or credit transfers programs abroad. Transfer credit/terms are included in this comparison.

- ⁽¹⁾ Cohorts are comprised of first-time, fulltime freshman completing a first undergraduate degree. Students receiving more than one degree counted only once.
- ⁽²⁾ Study Abroad is defined as credit bearing experiences for purposes of this report.
- ⁽³⁾ Transfer credit/terms are included in this comparison
- ⁽⁴⁾ Any minor headcount differences in student department and/or major affiliation may be due to department/major changes over time.
