Executive Summary

The global economy of the 21st century requires university graduates to function effectively in an international environment. Recognizing this need, Texas A&M University provides many opportunities for students to gain international education experience and for faculty, who inspire these students, to research and teach abroad. Texas A&M is also committed to providing a welcoming environment for its international students, faculty and visiting scholars.

Texas A&M University’s long history of international involvement has created a solid foundation for future plans to make Texas A&M one of the top ten public universities in the country, as outlined in the long-range planning document, Vision 2020. Texas A&M is committed to achieving Imperative 6: “Globalize and Diversify the Campus.”

The International Programs Office is the centralized unit responsible for coordinating and promoting Texas A&M’s numerous international activities. Its goal is to infuse an international dimension into the teaching, research and public service programs of the University. This is accomplished both through academic and professional training and by creating a global awareness through on and off-campus programs. In addition, each College at Texas A&M University has international programs and activities available to students, faculty and staff. International Programs for Students is comprised of four academic support offices that facilitate international education: International Student Services, Sponsored Student Programs, Study Abroad Programs and The Santa Chiara Study Center in Italy. This report includes statistical information about all these.

According to Open Doors 2004, published by the Institute for International for International Education, the enrollment of international students and the number of students has increased while the number of students taking part in credit bearing Study Abroad Programs at Texas A&M University have increased. In 2002-2003 (the most recent national data available), Texas A&M University ranked thirty fifth in the U.S. among research institutions in the number of students earning credit when comparing data from the academic years 2002-2003. For Fall 2004, Texas A&M University ranked eleventh in the U.S. for the total number of enrolled international students.

However, there is an indication that these trends may not continue in 2004–2005 international students applications have decreased nation-wide while participation in study abroad programs has increased.

Please send any comments or suggestions that you might have regarding this report to our office.

In Fall 2004, the international student population at Texas A&M University decreased by 0.18%; whereas, the total number of international students in the US decreased by 2.4%. The total of the international students as percentage of the student body at Texas A&M University has been fairly constant from Fall 2003 to Fall 2004 at 8.4%, as reported by the Institute for International Education, in the annual Open Doors report.

Source: International Institute for Education, Open Doors 2004
Over the last twenty years, the distribution of international students has changed dramatically. Undergraduates are no longer the largest group of international students and currently their total is less than 14.5% of the 3,815 enrolled for Fall 2004. For the first time in the last 9 years the total number of international students seeking a Ph.D. is higher than those pursuing a Masters.

* The total does not include non-degree students.
In the 1960s the largest number of international students was in the College of Agriculture. That trend has changed drastically. In Fall 2004 only 5.3% were enrolled in the College of Agriculture while 51.4% were enrolled in engineering programs.
The majority of Texas A&M students have always been male, although the percentage of females has increased slowly over the years. While the majority of the students pursue their educational goals as F-1 visa holders, there are other visa holders enrolled. In fact there are some full time employees, H-1.
Geographically, Texas A&M University’s international student population mirrors national demographics, with the largest number of students coming from Asia. Although, in Fall 2004, 127 countries are represented, the top three countries, India, P.R. China and South Korea have been among the top five countries represented by international students at Texas A&M for nearly a decade. The vast majority of students from the Middle East and Turkey are sponsored international students.

The largest number of Texas A&M students who study, work, research, or travel outside the United States are undergraduate students taking part in faculty-led group programs. The total number of students studying independently abroad has increased consistently since 1989 to an all-time high of 226 in 2004, primarily due to the elimination of administrative barriers that make independent programs complex and access to advising specifically for these students. In addition, Texas A&M also increased the total faculty-led programs available to students for studying abroad and these programs are initially seeing a rebound after decreased enrollment post September 11, 2001. Non-credit activity level has primarily increased through college efforts to engage freshmen learning communities in international experiences.

SCHOLARSHIPS

Financial support is still one of the major barriers for students to pursue international education opportunities. Study Abroad Program oversees scholarships for international education, and the demand for these increased dramatically in 2004 with the advent of an online application. However, students also indicate an increasing need for scholarships with the continued devaluation of the U.S. Dollar to the Euro, since majority of Texas A&M chose to study in Europe.

International Educational Fee Scholarships for Summer / Fall Awards

Study Abroad Fellowships For Summer / Fall Awards
Sponsored Student Programs provides international students sponsored by governments, businesses or other agencies special assistance with admission, pre-arrival information, academic program arrangements and billing, and liaison services with various entities.

SPONSORED STUDENT PROGRAMS
ENROLLMENT TRENDS

September 11, 2001 had a dramatic impact on the sponsored student population since so many students from Arab and Muslim nations either chose to study in other countries, found it impossible to obtain a U.S. visa in a timely manner, or anticipated an unwelcome environment in our country. Despite this, application for Fall 2005 from these students, unlike the general international student population, have increased. Therefore, the enrollment of sponsored students will likely increase in 2005.

http://studyabroad.tamu.edu/santa_chiera/
Texas A&M University students studied in forty six countries in 2003-2004. However, the most popular destination is Italy due to programs offered at the University’s Santa Chiara Study Center in Castiglion Fiorentino, Italy. Over 2,000 students have participated in engineering, architecture, business, education and liberal arts programs since the center’s opening. All students study Italian arts and civilization while at the Center; other courses rotate based on selected faculty proposals.
