THES is published in the United Kingdom and results are released each October. Primarily important to UK readers, universities are judged by thirteen indicators grouped into five areas: Teaching, knowledge transfer, research, citations, industry income, and international outlook. Starting in 2015, THES collects data through University surveys and draws from Elsevier’s Scopus database for academic publication citations. THES’s current world rankings may be found at: <https://www.timeshighereducation.com/> Subject area rankings are provided for arts and humanities; clinical, pre-clinical and health; engineering and technology; life sciences; physical sciences; and social sciences. These may be found in the above link.
